# How Shield EMI Protection Works

→ The entire Process of Activating the App would be done by the Retailer. The process is very easy and user friendly for the retailers.

→ The retailer will have the rights where he/she would be able to trigger the option for locking the handsets. Once the Lock Handset option is triggered the customer won't be able to use the handset till the time it is unlocked.

**SHIELD EMI PROTECTION**  
— SECURING THE FUTURE —

**Locking the Phone means:**

- No Outgoing Calls.
- The Handset will be as good as a Dummy Handset.
- SIM change does not help to Unlock the device.

The Retailers can opt to Lock  
The Customer's Phone who has defaulted in  
EMI payments.

The device screen will only show the message that his EMI is  
pending and it has to be paid on an immediate basis to unlock  
the device.
